

HEALING OF CARPAL TUNNEL SYNDROME

—The testimony of Diamando Tserpes—

For many years I was working in a kitchen, and I had a big problem with my right hand. I developed carpal tunnel syndrome, and the doctors were telling me that I absolutely needed to have surgery. I couldn't take time off work, however; I needed the income. I started anointing myself with oil from St. Nektarios. In one-two weeks it gradually got better and better, and in one month it was completely healed. When I went to see the doctor again, I told him I was better. He told me that your hand was in very bad shape. The nerve was severely compressed; now it is just fine. I thank Saint Nektarios and our Almighty God.
