

HEALING OF PANCREATIC CANCER

—The Testimony of Stephen Fraser—

November 11, 2023

Contemplating with gratitude my medical journey and my blessings, I thank God, Saint Nektarios, and the Fathers of Saint Nektarios Monastery for so many blessings, so much miraculous healing and life.

During 2016, I was diagnosed with pancreatic cancer and had surgery and did chemotherapy. On January 2022 a recurrence was found. Around that time I received blessed oil from the Saint Nektarios Monastery along with a Saint Nektarios prayer card and began and completed another chemo series. I said the Saint Nektarios prayer asking for his intercession to call upon God for my healing and used the blessed oil nightly, applying it with a sign of the cross in the area of my cancer.

As we approach 2 years from the recurrence, I just heard from my doctor at Sloan Kettering where I participate in a clinical trial that there is no sign of cancer progression.

I thank God. I have tried many angles in the battle against cancer, “firing all canons” I could against it. But more than anything it is God Who I thank that I am alive and well, and I thank Saint Nektarios and the fathers of the monastery for interceding on my behalf.

Praise God, thank God, and thank you.
